'Ekahi Club Event: Be Green

Our 'Ekahi Members joined us for the most recent In the Know Speaker Series on Earth Day - April 22nd. The student government group from Island Pacific Academy (IPA) in Kapolei presented their eco-friendly school projects. These projects educate our younger generations on how to take care of our precious islands, such as recycling competitions, collecting tennis shoes to build playground flooring and vermicomposting on campus (recycling with worms). Additionally, they suggested tips on how we can incorporate simple actions into our daily lives to make a difference in the environment. The green movement applies to everyone so we can all get involved to protect our 'aina for generations to come.

Our guests brought a variety of items, including cans, bottles, old cell phones and ink cartridges, to be recycled by IPA to raise funds for their school.

Being green is important to 'Ilima, as our innovative community will feature many sustainable design and operational elements throughout. 'Ilima shared with our guests some of these elements for our planned development before we enjoyed pupus and desserts using local products. See our Kisco Highlights section for our 'Ilima Top 10 list.

5 SIMPLE BE GREEN TIPS:

- 1 Collect items to be recycled and donate them to your local schools to help them raise money.
- 2 Turn off the lights and your computers when not in use.
- 3 Consider car pooling with friends and family or take the bus.
- 4 Use reusable bags when shopping.
- 5 Fill up reusable water bottles instead of buying bottled water.

Kisco Highlights

'Ilima's Top Ten Sustainable Features

- 1 A fleet of electric vehicles will be provided for staff and resident use.
- 2 New trees, shrubs and ground cover will be indigenous species and primarily drought tolerant varieties. The irrigation system will be designed to use reclaimed waste water.
- 3 All toilets and showerheads will be low flow and hot water will be continuously circulated in insulated pipes.
- 4 Appliances will be Energy Star rated.
- 5 All lighting will be compact fluorescent fixtures.
- 6 Swimming pools and domestic hot water will be heated with heat recovered from the central air conditioning plant.
- 7 Recycled building materials will be used to the greatest extent possible.
- 8 Recycling bins throughout the community will encourage reuse of plastic, glass, metals and newspaper.
- 9 Commercial kitchen organic waste will be composted to provide fertilizer for resident gardens.
- 10 The campus will use a highly efficient central chilled water plant that will provide air conditioning to all buildings from one source.

... AND MANY MORE SUSTAINABLE DESIGN FEATURES ARE PLANNED FOR 'ILIMA AT LEIHANO!

City of Kapolei News

Kapolei Parkway Extension Complete

Kapolei Parkway's extension between Renton Road and Fort Barrette Road has been completed. This extra roadway has provided another alternate route and has improved traffic flow between the residential and commercial areas of Ewa, Kapolei, Makakilo and Campbell Industrial Park. It is exciting to see all of Kapolei's city plans materializing!

Malama Learning Center Offers Workshops

The Malama Learning Center will be a wonderful educational facility in Kapolei that will bring art, science, conservation and culture together to promote sustainable living throughout Hawaii. Until it is built, they are offering workshops that encompass its vision. Workshops run from 9:30 am to 12 noon at Kapolei High School. Cost is \$7 per person or \$15 for families of up to 3 people.

Please see back page for schedule of classes
